

Engineering Technician – Field and Lab:

ALLWEST is seeking Engineering Technicians based in our Hayden, Idaho office. We are an employee owned geotechnical engineering, environmental, and construction materials testing firm serving our clients throughout Idaho, Washington, and Montana from our five offices.

Job Responsibilities:

Reviewing of project plans and project and/or state specifications, testing and inspection of soils, asphalt and concrete; writing of daily inspection reports, and communication with project manager, senior field staff, project engineers, and project owners.

Requirements:

The ideal candidate will be detail oriented and have experience in the testing and inspection of soils and asphalt in the field and laboratory. This position requires basic math skills, strong written and verbal communication skills and a client-service approach.

We prefer applicants that hold certifications in one or more of the following: ACI, ICC, and/or Nuclear Gauge Training. This position will require field inspection work and require the physical ability to lift greater than 50 pounds.

Benefits:

- Eligible employees enjoy the following: medical, dental, vision, STD, Life, FSA, PTO, 401k with company match, employee stock ownership plan.

Send letter resumes and letter of interest to careers@allwesttesting.com.
